

Assignment #10

Digit Comparison

Write a program to read two integers and return true if they have the same last digit. Include a class UserMainCode with a static method **compareLastDigit** which accepts two integers and returns boolean. (true / false)

Create a Class Main which would be used to accept two integers and call the static method present in UserMainCode.

Input and Output Format:

- Input consists of two integer.
- Output consists TRUE / FALSE.
- Refer sample output for formatting specifications.

Sample Input 1:

59

29

Sample Output 1:

TRUE

Sample Input 2:

34

29

Sample Output 2:

FALSE
