Assignment #34

Read the portion from a file

Write a java program to read the input character stream and print the portion of the character as required based on the user's input start and end index. Use BufferedReader and skip the number characters using the skip() method and read the characters from the input file and display it on the console.

Read the character stream from the input file (outcome.txt) and display the output in the console.

Input and Output Format:

- First two input corresponds to the start index and end index.
- Refer sample input and output for formatting specifications.
- [All text in bold corresponds to input and the rest corresponds to output]

Sample Input/Output :

19

64
